COFORGE

Software Engineer

02/2020 - Present

COMPANY PROJECTS

- A dashboard for a Banking services company website that provides real-time data visualization and analysis. I was responsible for implementing the front-end using HTML, CSS, JavaScript and React.
- Airline Loyalty Program: Build an airline loyalty program that allows users to earn and redeem points for flights, upgrades, and other rewards. I was responsible for implementing the front-end using HTML, CSS, JavaScript and Angular.
- An Banking website that allows users to look for the Account details and their investments and manage their accounts. I was responsible for implementing the front-end using HTML, CSS, JavaScript .

PERSONAL PROJECTS

Portfolio Website

- My Personal portfolio website with all the necessary information about my self including My Bio, Job Experience, About, project that I made, and a toggle switch that switch between Dark and light mode in this I used React, Bootstrap and Material UI. I have also deployed the portfolio on web using Vercel.

BMI Calculator

- This calculator can give you BMI of you by entering your Weight(kg) and Height(feet) and also tell if you are under Weight, Fit or Over Weight as well

Todo App

- The app have a homepage that displays the user's current tasks in a list format. Users can add new tasks to the list by typing in a task description and pressing enter or by clicking on the 'add' button. The app can have a feature to edit or delete tasks from the list as well using React, Bootstrap, Material UI

OBJECTIVE

• As a highly motivated professional, my goal is to join a reputable organization where I can utilize my skills, experience, and expertise to contribute to the success of the company. I always tried my best to be committed to delivering high-quality work and exceeding expectations in all tasks assigned to me. By working collaboratively with the team, I aim to create a mutually beneficial situation where the company can benefit from my contributions and I can achieve my professional goals.
